Subject: "Super-bass" car audio systems disturb the peace.

Statement of Presentation you wish to make and statement of action you wish Council to take.

When motorists of Durham use their "super-bass", booming car audio systems, even at low volume, other citizens are disturbed. Often we cannot see the offender's car. The bass noise travels great distances. Calls to the police do not work because they require a street address and usually, of course, the offender's car is moving.

The use of these systems needs to be outlawed. The police need to stop these booming vehicles and give citations to the offenders.

Thank you for your consideration.
